KEY TO THE REGISTER

(For explanation of classification symbols of the British Corporation Register, see page 4)

Columns 2 & 3

Decks. See illustrations of types of ships in Appendix. Explanations of such terms as *Shelter dk*, &c., are included in the alphabetical key, see pages 5 to 7.

Where no record of decks appears it is to be assumed that the ship has only one continuous deck.

Unless otherwise stated, it may be assumed that decks of steel ships are constructed of steel.

Special Surveys. Explanations of records of periodical special surveys will be found in the alphabetical key, see page 7. The records certify to the ship's state of efficiency *at the time of survey*.

Ports of Survey. The contractions (such as Lon, Syd, &c.) used to denote the ports at which ships have been surveyed, are explained on page 9.

Material, Rig, &c. Unless otherwise stated, all ships are of steel construction and propelled by a single screw. Explanations of contractions used to denote the rigs of ships will be found in the alphabetical key, see pages 5 to 7.

Late Names. The figures following a late name of a ship indicate the year in which the change of name took place.

Column 4

Tonnage. The tonnage recorded in the Register Book in type like that shown at the side hereof is, with a few exceptions, the official registered tonnage measured according to the law of the country to which the ship belongs.

3101 (Gross)
2864 (Under dk.)
1994 (Net)

For some foreign ships, the tonnage which is recorded has been measured in accordance with British rules and is accepted under British law. In such cases, the fact is indicated by the use of italic figures, thus:—

3101 (Gross)
2864 (Under dk.)
1994 (Net)

Columns 5 & 6

Symbols of Classification of Lloyd's Register

100A1.........
90A1 ....
Characters of ships built of Iron or Steel according to Rules of the Society since 1869. The numerals 100, 90, &c., do not signify terms of years, but the standard of classification.

A1..............Character assigned to ships intended to trade within specially sheltered limits such as harbours, rivers or estuaries.

For ships built and classed prior to the 1948/49 Rules and Regulations the character was also assigned for limited seagoing service.

A1..............Character of Wood or Composite ships of the first class well and sufficiently equipped. The figures in column 5 prefixed to the character indicate the term of years for which the ship is at present classed, thus:—11A1, Cont 6A1, Rest 6A1. (See notes in alphabetical key, pages 5 to 7, under "Cont" and "Rest".) The figures in column 7 indicate the expired terms of years originally assigned, if on the first line, and assigned on continuation or restoration if on lower lines.

A1..............Character of wood ships which have passed the period assigned on original Survey, or Continuation, or Restoration, and of ships not having an original character, which are found to be fit to carry dry and perishable goods. The term of years for which this character is assigned appears under the class in column 5, thus:— SSPly.54–6yrs.

1..................The figure 1 in the character signifies that the ship has equipment of anchors, chain cables and hawsers in accordance with, or of a standard equivalent to the requirements set forth in the Rules, or which is acceptable to the Committee for a special or restricted service. If, by reason of the ship's service, normal equipment is considered to be unnecessary, the figure 1 may be omitted from the character of classification.

– ....This sign, in the position usually occupied by the figure 1, indicates that the approved equipment of the ship is temporarily deficient in quantity or quality.

✠................This sign denotes that the ship has been built under Special Survey.

✠................This sign denotes that the engines or the boilers, or both (according to the record which follows), have been built under Special Survey.

—— 6,54 ....A black line, with date underneath, indicates that the ship's character was expunged from the Register Book at the date specified because, on account of reported defects, the ship was not entitled to retain her classification.

—— 6,54 ....A red line, with date underneath, indicates that the ship's character was expunged from the Register Book at the date specified because, on account of non-compliance with the Society's Rules as regards surveys, the ship was not entitled to retain her classification.

... 6,54 ....Three black dots, with date underneath, indicate that the ship's character was withdrawn from the Register Book at the Owner's request at the date specified.

Examined LR 6,54 Indicates that the ship, which was classed in another Register, has been surveyed for maintenance by the Society's Surveyors at that date. The period of validity of such notation is 12 months, unless otherwise specified.

~~100A1~~ ....When a posting of loss, condemnation, casualty, &c., is made against a classed ship, the character is expunged in this manner.

with freeboard This notation under the character signifies that the freeboard assigned is a condition of the ship's class.

In the case of ships built under the 1948/9 Rules and Regulations and subsequently, this notation has been discontinued, as the scantlings of all ships under these revised Rules are based upon a specified draught.

Symbols of Classification of the late Underwriters' Registry

(Amalgamated with Lloyd's Register in 1885)

A1* A1*...Characters of Iron, Steel, or Composite ships built
A1, A1, according to the Rules of the Underwriters' Registry.

Ships classed in red were built under the inspection of the Surveyors to the Underwriters' Registry.

The figure 1 affixed to Symbols of Classification signifies the Character of Equipment.

Date of Survey. The figures under a character denote the date of the last reported examination in dry dock.

Ports of Survey. An explanation of contractions used to indicate surveying ports will be found on page 9.

A port of survey printed in black signifies the port of the last dry docking. When printed in red it is the port at which a general examination has been held.

When the ports at which the last dry docking and general examination coincide, the port recorded in red stands for both surveys.

Where the 5th column is blank, this indicates that the ship has never been classed by Lloyd's Register.

When the 5th column is left blank, except as regards the last docking date and black and red crosses, if applicable, it indicates that the character has expired, or that it has been withdrawn in default of survey or on account of non-payment of fees due.

Column 7

The letters *a*, *a*†, *a**, *b*, *b*†, *b**, &c., printed in black in column 7 indicate the Equipment Letter determined by the Rules.

The letters *a*, *a*†, *b*, *b*†, &c., in the same column are those employed to determine the fees for Special Surveys on the hull, and are not to be used to ascertain the equipment from the Rules. Where no red letter is shown, the Equipment Letter is to be used for determining the fee for a Special Survey of the hull.

The figures 1⅞, 2¼, &c., under the Equipment Letter, indicate the sizes of chain cables specially supplied or approved, which are not in accordance with those corresponding to the Equipment Letter.

Where ships are provided with special quality steel cable of a diameter less than that required by the Rules for wrought iron cable, the diameter is printed in red in column 7.

For Wood or Composite ships, the figures in column 7 indicate the term of years originally assigned but now expired, or, if prefixed by C or R, assigned on Continuation or Restoration, but now expired.

Column 8

Date of Build. In the case of Iron and Steel ships classed by Lloyd's Register, the date of build recorded in the Register Book is in accordance with the Rules. For ships not classed by Lloyd's Register, it is not possible to define whether the date of build is the date of launch or the date of completion.

In cases of ships built to Class in which the fitting out after launching was, for any reason, unduly prolonged, both the date of launch and the date of commissioning may be entered in column 8; and in such cases the first Periodical Special Survey will date from the "Commissioned" date.

Column 10

Owners. In the case of ships of British Registration, the name recorded in the Register Book is that of the Managing Owner, or of the firm in which the Managing Owner is a partner. When there is not a Managing Owner appointed, the name of the largest shareholder is recorded; and the name of the Manager of the ship is also noted if desired. In the case of colonial or foreign ships, however, it is impossible to ensure that a person entered as Managing Owner is in every instance a legal owner. He may sometimes be only the *Manager* of a ship as distinguished from *Managing Owner*.

Column 11

Dimensions. The Registered dimensions of ships in these columns are recorded in feet and tenths of a foot.

Length. When two lengths are recorded thus: $\genfrac{}{}{0pt}{}{315\cdot3}{304\cdot0}$ the upper figures denote the length according to the Official Register of the ship, and the lower figures according to British practice.
In the case of some ships the over-all length is also recorded and is indicated by the letters O.L. in parentheses, thus:—325·5(O.L.).
In the cases of Italian and Finnish ships the registered length is to be regarded as an over-all length except where recent changes of flag have taken place and the new registered dimensions are not yet available.

Breadth. When two breadths are recorded thus: $\genfrac{}{}{0pt}{}{50\cdot9}{53\cdot2}$ the upper figures denote the breadth according to the Official Register of the ship, and the lower figures the extreme breadth to outside of plating. In the cases of some steamers of small tonnage, mostly of the coasting type, the extreme breadth over belting is recorded in italics thus: *25·4*.

Depth. When two depths are recorded thus: $\genfrac{}{}{0pt}{}{17\cdot9}{25\cdot7}$ the upper figures denote the depth according to the Official Register of the ship, and the lower, the depth in hold from the uppermost continuous deck. In some countries the registered depth is the same as the moulded depth.

Trawlers. In the entries of certain trawlers, the moulded dimensions are recorded below the registered dimensions. These figures have, in most cases, been obtained from the builders.

Water Ballast. See explanations and illustrations on page 8 of key.

Column 12

Port of Registry. The Port of Registry is shown in roman type, while a port recorded in italics is the ship's Home Port, as distinct from the Port of Registry.

Column 13

All contractions used in relation to Engines, Boilers, Furnaces, &c., are explained in the alphabetical key, see pages 5 to 7.

Machinery Numeral MN Fees for Complete Surveys of Machinery are based on the Machinery Numeral.
The Machinery Numeral printed in roman type, thus 550MN, is that calculated by the formula in force at the time of classification of the machinery.

MN When the Machinery Numeral is printed in italic type, thus *MN550*, it is one-fifth of the total horse power for which the prime movers have been approved.

Boiler pressures. The working pressures of all main and auxiliary boilers are indicated in roman characters; those of donkey boilers in italics; thus 200 lb. (main or auxiliary) *100 lb.* (donkey).

Where a donkey or auxiliary boiler is out of use but is still on board, this fact is indicated by the record in column 13 being ruled through with a thin red line.

Column 14

Moulded Depth. The moulded depth of an Iron or Steel ship is the perpendicular depth taken from the top of the upper deck beam at side, at the middle of the length of the ship, to the top of the keel and the bottom of the frame at the middle line. In Wooden and Composite ships the moulded depth is the perpendicular depth from the top of the upper deck beam at the side of the ship amidships to the lower edge of the rabbet of the keel.

In Wooden and Composite ships where the lower part of the midship transverse section is of a hollow character (as in cases where thick garboard strakes are fitted) the moulded depth is measured from the point where the line of the flat of the bottom cuts the keel. Fractions of an inch are not recorded.

Freeboard. The freeboard entered in this column is the Summer freeboard measured from the deck line at the freeboard deck to the centre of the Load Line disc in accordance with the International Convention respecting Load Lines.

The freeboard and corresponding draught are entered for all ships built under the 1948/9 and subsequent Rules irrespective of whether the freeboard is assigned by the Committee. In the case of ships built under previous Rules the freeboard and draught are entered only when the freeboard is assigned by the Committee or when the freeboard is a condition of the ship's class.

Draught. The "corresponding draught" for all cases recorded prior to August, 1923, is the calculated draught of water from bottom of keel to centre of load line disc and fractions of an inch are not recorded. Subsequent to that date the actual draught to the nearest quarter of an inch, as supplied by the respective Shipbuilders, is recorded.

◊ **In the case of ships built and classed in accordance with the 1948/9 Rules and Regulations and subsequently, the symbol ◊ indicates that the draught for which the scantlings have been approved is less than the maximum which would otherwise be permitted by geometrical factors alone.**

TABLE EXPLICATIVE DU REGISTRE

(Pour l'explication des symboles de classification du Registre de la "British Corporation," voir page 14)

Colonnes 2 et 3

Ponts. Voir les dessins des différents types de navires dans l'Appendice. Les explications des termes tels que *Shelter dk,* etc., sont fournies dans la Table Explicative, voir pages 15 à 18.

Lorsqu'il n'est pas fait mention de ponts, il y a lieu d'assumer que le navire n'a qu'un seul pont continu. Lorsqu'aucun renseignement n'est donné à ce sujet, l'on peut assumer que les ponts des navires en acier sont en acier.

Visites Périodiques. Les abréviations telles que (Lon, Syd, etc.), employées spéciales se trouve dans la Table Explicative, voir page 17. L'enregistrement indique la condition du navire à l'époque de la visite.

Ports de Visite. Les abréviations telles que (Lon, Syd, etc.), employées pour indiquer les ports où les navires ont été inspectés, sont expliquées à la page 20.

Matériaux, Gréement, etc. Sauf avis contraire, tous les navires sont construits en acier et propulsés par une seule hélice. Les abréviations employées pour spécifier le gréement des navires sont expliquées dans la Table Explicative, voir pages 15 à 18.

Anciens Noms. Les chiffres à la suite d'un ancien nom de navire indiquent l'année pendant laquelle le changement de nom a eu lieu.

Colonne 4

Tonnage. Le tonnage qui figure sur le "Lloyd's Register Book" en caractères comme ci-contre, est à part quelques rares exceptions, le tonnage officiel mesuré d'après les lois du pays auquel le navire appartient.

3101 (Total)
2864 (Sous le pont)
1994 (Net)

Pour quelques navires étrangers, le tonnage qui figure a été mesuré d'après la méthode Anglaise, et est reconnu par la loi Anglaise. Dans ce cas le fait est mentionné par l'emploi de caractères italiques, comme ci-contre.

3101 (Total)
2864 (Sous le pont)
1994 (Net)

Colonnes 5 et 6

Marques de Classification du Lloyd's Register

100A1 .... 90A1 .... Cotes des navires en fer ou en acier, construits conformément aux règlements de la Société depuis 1869. Les nombres 100, 90, etc., n'indiquent pas une période d'années, mais le type de classification.

A1.................Cote attribuée aux navires destinés à naviguer dans des parages abrités, tels que ports, rivières et estuaires. Pour les navires construits antérieurement aux Règlements de 1948/49, cette cote était aussi attribuée aux navires destinés à un service maritime restreint.

A1......................Première cote des navires en bois ou composites dont l'armement est bon et suffisant. Les chiffres qui précèdent la cote, colonne 5, indiquent le nombre d'années pour lesquelles le navire a été coté, ainsi :—11A1, Cont 6A1, Rest 6A1. (Voir "Cont" et "Rest" dans la Table Explicative, pages 15 à 18.) Les chiffres dans la colonne 7 indiquent les périodes expirées pour lesquelles les navires avaient été cotés. A la première ligne ces chiffres indiquent la période originelle, aux lignes suivantes les périodes de continuation ou de rétablissement.

A1.....................Cotes des navires en bois pour lesquels les périodes assignées soit originellement, soit par Continuation ou par Restauration sont expirées, ou cote des navires qui n'ont jamais eu de cote originelle mais qui sont jugés aptes à transporter des marchandises sèches et périssables. Le nombre d'années pour lesquelles la cote a été assignée figure sous la cote dans la colonne 5, ainsi :— SSPly.54–6yrs.

1.........................Le chiffre 1 faisant partie de la cote, indique que le navire est équipé d'ancres, de câbles-chaînes et d'aussières conformes aux exigences des Règlements, ou d'un échantillonnage equivalent, ou qui ont été approuvés par le Comité pour un service spécial ou restreint. Si par suite du service du navire, l'équipement normal n'est pas jugé indispensable, le chiffre 1 peut être omis de la cote du navire.

— .... Ce signe à la place occupée normalement par le chiffre 1, indique que l'armement réglementaire du navire ne répond momentanément pas aux exigences de la Société, soit comme qualité, soit comme quantité.

✠ ....Ce signe indique que le navire a été construit sous surveillance spéciale.

✠ ....Ce signe indique que les machines ou les chaudières, ou toutes les deux (suivant l'annotation dont il est suivi) ont été construites sous surveillance spéciale.

$\overline{6,54}$ ....Une ligne noire avec date au-dessous, indique que la cote du navire a été retirée du "Lloyd's Register Book," le navire ne pouvant conserver sa cote par suite de défectuosités signalées.

$\overline{6,54}$ ....Une ligne rouge avec date au-dessous, indique que la cote du navire a été retirée du "Lloyd's Register Book," le navire ne pouvant conserver sa cote par suite de dérogation aux règlements de la Société en ce qui concerne les visites.

... 6,54 ....Trois points noirs inséré avec date au-dessous, indique que la cote du navire a été retirée du "Lloyd's Register Book" à la demande de l'armateur à la date indiquée.

Examined LR6,54 Signifie que le navire, qui était coté auprès d'un autre Registre, a été soumis à une visite d'entretien par les Inspecteurs de la Société à la date indiquée. La période de validité d'une telle annotation est de 12 mois, à moins de mention contraire.

~~100A1~~ ......Quand un navire coté est mentionné comme perdu, condamné ou ayant tout autre accident, etc., la cote est rayée comme ci-contre.

with freeboard....Cette mention sous la cote indique que le franc-bord assigné est une condition de la cote du navire.

En ce qui concerne les navires construits d'après les Règlements de 1948/9 ou plus récemment, on a cessé de faire usage de cette mention, étant donné que d'après ces Règlements les échantillonnages de tous les navires se basent sur un tirant d'eau spécifié.

Marques de Classification de l'ex Underwriters' Registry

(Réuni avec le Lloyd's Register en 1885)

A1* A1*
A1, A1,

Cotes des navires en fer, en acier ou composites, construits conformément aux règlements de l'Underwriters' Registry.

Les navires cotés en rouge ont été construits sous la surveillance des Inspecteurs de l'Underwriters' Registry. Le chiffre 1 à la suite des marques de classification indique la cote de l'armement.

Date de Visite. Les chiffres sous une cote indiquent la date de dernière visite en cale sèche connue.

Ports de Visites. Les abréviations employées pour indiquer les ports de visites sont expliqués à la page 20.
Un port de visite imprimé en noir indique le port de la dernière visite en cale sèche. Quand il est imprimé en rouge, il s'agit du port auquel une inspection générale a été effectuée.

Lorsque la dernière visite en cale sèche a eu lieu dans les mêmes ports que l'inspection générale, le port imprimé en rouge se réfère aux deux visites.

Quand la 5me colonne est laissée en blanc, cela indique que le navire n'a jamais été coté par le "Lloyd's Register." La 5me colonne laissée en blanc, sauf en ce qui concerne l'époque de la dernière visite en cale sèche et les croix noires et rouges, s'il y a lieu, indique que la cote est expirée ou bien qu'elle a été rayée à défaut de visite ou par suite du non-paiement des honoraires dûs.

Colonne 7

Les lettres *a*, *a*†, *a**, *b*, *b*†, *b**, etc., en noir dans la colonne 7, indiquent la lettre d'armement d'après les règlements.

Les lettres *a*, *a*†, *b*, *b*†, etc., en rouge dans la même colonne, servent à déterminer les honoraires pour les visites périodiques de coque, et ne doivent pas être utilisées en vue d'établir l'armement conformément aux règlements. Lorsqu'il n'y a pas de lettre rouge, la lettre d'armement sert à déterminer les honoraires pour les visites périodiques de la coque.

Les chiffres 1⅞, 2¼, etc., au-dessous de la lettre d'armement, indiquent la grandeur de câble-chaîne spécialement fournie ou approuvée et non-conforme à celle correspondant à la lettre d'armement.

Lorsqu'un navire est pourvu d'une chaîne d'acier de qualité spéciale d'un diamètre inférieure à celui exigé par les Règlements pour les chaînes en fer forgé, sont diamètre est imprimé en rouge dans la colonne 7.

Pour les navires en bois ou composites les chiffres dans la colonne 7 indiquent les périodes, actuellement échues, pour lesquelles les navires avaient été cotés. Quand ils sont précédés de C ou R, ils indiquent les périodes, actuellement échues, pour lesquelles les cotes avaient été continuées ou rétablies.

Colonne 8

Date de Construction. Dans le cas des navires en fer et en acier classés au Lloyd's Register. la date de construction inscrite dans le Registre est conforme aux Règlements. Pour les navires non cotés par le Lloyd's Register, il n'est pas possible de spécifier si la date de construction est celle du lancement ou celle de l'achèvement des travaux.

Pour les navires construits sous la surveillance de la Société et dont l'achèvement après le lancement se trouve, pour une raison ou une autre, retardé de façon excessive. la date du lancement, ainsi que la date de la mise en service, figurent dans la colonne 8; dans ce cas. la date de la première inspection spéciale est calculée à partir de la mise en service.

Colonne 10

Armateurs. Pour les navires de la Grande Bretagne et de l'Irlande, le nom qui figure sur le "Lloyd's Register Book" est celui de l'armateur-gérant, ou celui de la Société dont l'armateur-gérant fait partie. Lorsqu'il n'y a pas d'armateur-gérant, le nom qui figure est celui du plus gros actionnaire et le nom du gérant figure aussi, si on le demande. Pour les navires coloniaux et étrangers, il n'est pas possible de certifier qu'une personne mentionnée comme étant armateur-gérant est, dans chaque cas, l'armateur légal. Dans certains cas la personne dont le nom figure peut n'être que *gérant*, ce qui est absolument distinct *d'armateur-gérant*.

Colonne 11

Dimensions. Les dimensions de douane des Navires, dans ces colonnes sont indiquées en pieds et en dixièmes de pieds.

Longueur. Lorsque deux longueurs sont mentionnées, ainsi $\frac{315\cdot3}{304\cdot0}$, les chiffres supérieurs indiquent la longeur d'après le Registre officiel national du navire et les chiffres inférieurs la longueur d'après la pratique anglaise. Dans le cas de certains navires, la longueur hors tout est aussi mentionnée, et est indiquée par les lettres O.L. entre parenthèses, ainsi 325·5 (O.L.). Dans le cas des navires italiens et finlandais, la longueur de douane est à considérer comme une longueur hors tout, sauf lorsqu'un récent changement de nationalité a eu lieu et que les nouvelles dimensions de douane ne sont pas encore connues.

Largeur. Lorsque deux largeurs sont mentionnées, ainsi $\frac{50\cdot9}{53\cdot2}$, les chiffres supérieurs indiquent la largeur d'après le Registre officiel national du navire et les chiffres inférieurs la largeur extrême allant jusqu'au côté extérieur du borde. Dans le cas de quelques vapeurs de jauge peu importante et principalement de cabotage, la largeur extrême, y compris la ceinture, est mentionnée en italique comme suit : *25·4*

Creux. Lorsque deux creux sont mentionnés, ainsi $\frac{17\cdot9}{25\cdot7}$, les chiffres supérieurs indiquent le creux d'après le Registre officiel national du navire et les chiffres inférieurs le creux dans la cale depuis le pont continu supérieur. Dans quelques pays, le creux du Registre est le même que le creux sur quille.

Chalutiers. Dans le cas de certains chalutiers, la longueur de l'etrave à l'étambot à la flottaison, la largeur hors membres et le creux sur quille sont insérés en-dessous des dimensions de douane. Dans la plupart des cas ces chiffres ont été fournis par les chantiers de construction.

Water Ballast. Voir explications et dessins à la page 19 de la Table Explicative.

Colonne 12

Port d'Armement. Le Port d'Armement est indiqué en caractères romains, fondis qu'un port inséré en italique est un port d'attache, en tant que différent du port d'armement.

Colonne 13

Toutes les abréviations employées se rapportant aux Machines, Chaudières, Foyers, &c., sont décrites dans la Table Explicative, voir pages 15 à 18.

Les honoraires pour visites périodiques de machines sont calculés d'après le "Nombre" de la machine.

"Nombre" de la machine MN Le "Nombre" de la machine, lorsqu'il est imprimé en caractères romains, ainsi : 550MN, a été calculé suivant la formule en vigueur au moment de la classification de la machine.

MN Lorsque le "Nombre" de la machine est imprimé en italique, ainsi : *MN550*, il représente un cinquième de la puissance totale en chevaux pour laquelle les machines motrices ont été approuvées.

Pressions des Chaudières. Les pressions de travail de toutes les chaudières principales et auxiliaires sont indiquées en caractères romains; celles des chaudières de petit cheval en italique, ainsi : 200lb. (principales et auxiliaires) ; *100lb.* (de petit cheval).

Lorsqu'une chaudière de petit cheval se trouve hors de service, bien que toujours à bord, le fait est indiqué en rayant les caractéristiques de la colonne 13 au moyen d'un trait rouge.

Colonne 14

Creux sur quille. Le creux sur quille pour les navires en fer et en acier, est la longueur de la perpendiculaire abaissée depuis la face supérieure des barrots du pont supérieur sur le coté et au milieu de la longueur du navire, jusqu'à hauteur de la rencontre de la face inférieure de la membrure avec le dessus de la quille sur la ligne médiane. Pour les navires en bois et composites, le creux sur quille est la longueur de la perpendiculaire abaissée depuis la face supérieure des barrots du pont supérieur jusqu'à hauteur de l'arête inférieure de la rablure de quille. Pour les navires en bois et composites dont les parties inférieures sont frégatées (lorsqu'un navire est pourvu par exemple de galbords épais) le creux sur quille n'est alors calculé que jusqu'à hauteur de l'intersection de la ligne prolongée des fonds avec la quille. Les fractions d'un pouce ne sont pas mentionnées.

Francbord. Le francbord figurant dans cette colonne est le francbord d'été mesuré depuis la ligne réglementaire du pont de francbord jusqu'au centre du disque de la ligne de charge, conformément à la Convention Internationale sur les Lignes de Charge. Le francbord et le tirant d'eau correspondant sont insérés pour tous les navires construits suivant les Règlements de 1948/9, ou des règlements plus récents, que le francbord ait été assigné ou non par le Comité de la Société.

Pour les navires construits suivant des Règlements antérieurs, le francbord et le tirant correspondant ne figurent au Registre que lorsque le francbord a été attribué par le Comité ou qu'il constitue une des conditions de la cote.

Tirant d'eau. Le "tirant d'eau correspondant," pour tous les cas mentionnés avant août, 1923, est le tirant d'eau calculé depuis le fond de la quille jusqu'au centre du disque de la ligne de charge; et les fractions de pouce ne sont pas mentionnées. Après cette date, le tirant d'eau actuel, à un quart de pouce près, et tel qu'il a été indiqué par les constructeurs de navire, est mentionné.

◊ Dans le cas des navires construits conformément aux Règlements de 1948/9 ou plus récemment, de symbole ◊ signifie que le tirant d'eau pour lequel les échantillonnages ont été approuvés est inférieur au maximum qui aurait été permis en ne tenant compte que des données géometriques.
